Jan. 1, 2016: Office closed

HomeTech Systems is a family-owned business. Our main service is helping to protect you and your family with Security Alarms & Camera systems for your home and business. We also design and install exciting Home Theater Audio systems and we have been introducing [HOME AUTOMATION](#) to many customers. We want our customers to feel safe and secure at home and at their businesses. You and your families are important to us. Let us know how we can serve you better.

An App to Arm your
house or business.

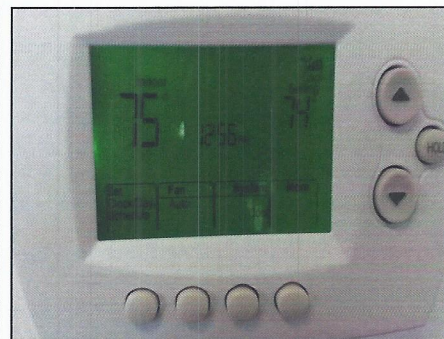

An App to turn on
your A/C—heater.

An App to look at
your home or
business Camera
system.

Forgot to Arm your **ALARM SYSTEM** before getting in bed, forgot to arm it before leaving the house or you just aren't sure? With the App on your mobile phone, you can check to see if you armed or disarmed your system ANYWHERE you are! Another feature: Get Alerts on your mobile phone each time the system is armed or disarmed or goes off when you aren't home. **What are you waiting for? Call today—only \$165** for the cell communicator which includes the installation and the APP. The service is \$13 a month.

Over to the right, a view from our **CAMERA SYSTEM** showing the entrance of our driveway. Thanks to our recorder, we caught the scene of a motorcycle accident and we were able to save it on a USB stick for the daughters of the hospitalized victim.

FREE HOME/OFFICE VISITS TO CHECK YOUR SYSTEM To show our appreciation to our customers, we are still in the process of calling all of our customers to come out and check your home or business Alarm system for FREE! New employees Holly and Steve will be calling and setting up the appointments. Josh, Dennis, or Steve will check your system, update your contact list and talk to you about our exciting new services.

Use the [A/C-Heater App](#) to turn on your system before you get home or before getting to work. What if you left on vacation and forgot to turn you're A/C or Heater off? NO PROBLEM...Pull up your App and make sure. **Interested?** Just call the office. The cost of the installation of this unit is only \$250.

ATTENTION CUSTOMERS - IMPORTANT INFORMATION

What is 2G? By now, most people have what is commonly called "smart phones" or 3G/4G cell phones. The G stand for "generation". In the cell industry 2G or 2nd generation will be phased out by the end of 2016. What does that mean for the Alarm System customer? For those of you that have an older cell communicator that are "2G" connected, they will have to be upgraded. Therefore, we will be contacting those customers who have the 2G communicator to discuss your options or you can call the office and we can look and see if you are on our 2G list.

\$100 for your Referrals Does anyone on your contact list, **NOT** have an alarm system? Do any of your employees have an alarm? How about your neighbors? Family, friends? Shouldn't they feel safe & secure like you do? We will give you a \$100, which you can either take as CASH, apply it to your monitoring or you can use it wherever it's needed. We just ask for them to sign a 3-year Monitoring Agreement.

Think about it....three referrals = \$300, that could pay for basic monitoring for a whole year.

DID YOU KNOW?

Your Home Owners or Business Insurance carrier should be giving you a **10-20% discount** for having a "monitored" Alarm system. Simply get your agents name and fax number, call or email us and we will send them your Alarm information to get you your discount.

Have a **FALSE ALARM** and can't remember your account number? You may want to change to a password like your 4-digit keypad code, pets name, something easier to remember. Email or call us to make that change.

For **billing of Service** and newer monitored accounts: Please send your payments back to us in the envelope we provide at: **3046 Atchison Street, Riverbank, CA 95367**

For **billing of Monitoring** for most accounts, please use the return envelope and send to our billing company at: **1646 West Chester Pike, Ste 30, West Chester, PA 19382**

Coming Soon: How-to Videos on our Website

HAVE YOU BEEN TO OUR WEBSITE?

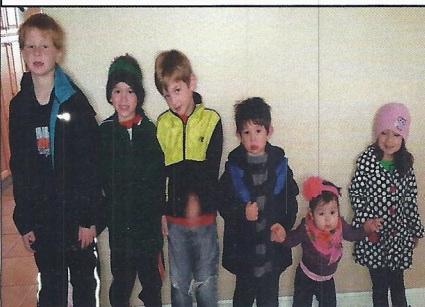

We have updated our website for your convenience.

Visit our site at: www.hometechsystems.net for the following:

- Instruction manuals for your keypad: Trouble shoot a problem
- See our Alarm Systems, Camera Systems, Audio Systems, etc.
- For our office phone number, our toll-free number, addresses and more!
- You will also be able to email us for contact list changes, going on vacation, or just for questions.

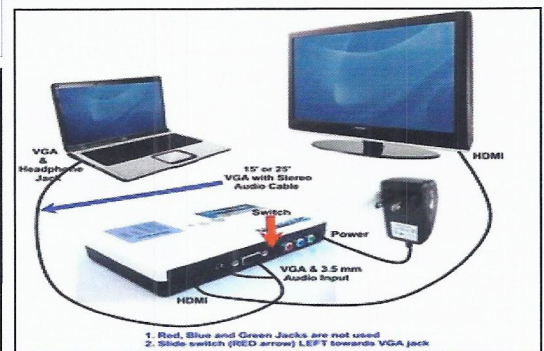

HOT***HOT***HOT***HOT***HOT***HOT

It's been so **HOT** but not to worry. You can still arm your system **AND** have your bedroom window open. **Two options:** 1) We can "vent" your window where it opens about eight inches and if someone moves it off it's mark, BAM, the alarm goes off! Or 2) We install an **alarm screen** that is wired into your system. As soon as someone tries to remove the screen, you guessed it, the alarm sounds! Call us **TODAY** to have **security** and feel **cooler**.

The grandbabies are growing. From almost 8 down to 1 year old now. We are so Blessed!

We need your email addresses! Why? So that we can send you any notices or specials going on. We hope to have a "Neighborhood Watch" in our building sometime this year. Having emails would save us the cost of postage. Please send all email addresses, changes, or questions to our Office Manager: holly@hometechsystems.net
THANK YOU, THANK YOU!
We have the best Customers!

Don't forget what all we do. Full TV/audio Systems—inside the house or outside on your patio. View who is at your front door by using your TV to switch to your Camera system. We almost do as many home cameras as we do business camera systems. We also do network cabling, electrical, central vac systems, and of course, burglar and fire alarms. Call for an estimate for any or multiple systems.
